## MFCR Round Manifold Compact System for Best Molding Performance

- \* Basic shank for most types of screw in end caps and gates.
- \* Minimum melt breakdown.
- \* High conductive heater enclose gives You more exact and even melt temperature
- \* Economic and fast colour change
- \* Heavy duty and long life proof.

**EWEBE MasterFlow** is a new design quality system for moulding with hot runner technology.

Our engineers have considered both old and new experiences when designing the system. For moulding sensitive components only verified solutions are chosen.

With more than 20 years in hot runner business and thousands of hot runner systems delivered, we can guarantee best assistance from mold design to production optimizing.

**EWEBE MasterFlow** is manufactured in Sweden by skilled workers and engineers.

High quality, fast and competent service, satisfied customers and reasonable price.
